Corrections/additions to the General Planning document for 2005 subject selection

1. 640-310 Physics Undergraduate Seminar

The zero point subject 640-310 Physics Undergraduate Seminar has now been changed into two (zero point) single semester subjects 640-311 and 640-312. Attendance at these seminars is not compulsory. However, students are strongly encouraged to attend as these seminars provide an opportunity for students to broaden their outlook on physics and are invaluable for students undertaking a major in physics.
